## SUMMARY

I am a web developer focused on front-end and back-end development. I am a motivated and passionate individual currently seeking to broaden his scope working in the coding industry. With many years in the customer service industry, I have gained many leadership and team management skills. These skills have allowed me to understand how to assist with clients' needs and be a good leader. I hope to use these skills to further company progress in the future.

## PROJECTS

### readMe Generator

April 2022 – May 2022

#### Personal Project

- ❖ Allows users to generate a stylized readMe doc for github with table of contents, links, and license tags.
- ❖ Uses express package inquirer to prompt the user with questions pertaining to their project.
- ❖ Writes to a file with a newly created readMe page after the user has finished all question prompts.
- ❖ Markdown was stylized to look neat and organized for the user's input, easily readable.
- ❖ Project aimed towards college students that need to generate a readMe for personal projects.

### iCard

March 2022 – April 2022

#### Contributor

- ❖ iCard is a site that allows the user to create a custom trading card with their own inputs and custom card backing.
- ❖ Users are able to view their made cards as well as other users in a public gallery. All cards saved to MySql database.
- ❖ Oversaw the login capabilities and clean user interface while creating a functional NavBar allowing users to browse the page.
- ❖ Assisted with login authentications that allow users to access parts of the web page with a made user account.
- ❖ Utilized MySql database that holds the users login data and database of users created cards shown in gallery.
- ❖ Aided with handlebars web page layout, specifically login, signup, profile page while handling styling of web page.

### MyGamesList

April 2022 – March 2023

#### Project Manager

- ❖ MyGamesList is a site where you can search for free games on the market and save them to a personalized list.
- ❖ Users are able to login and add their games to a list as well as delete them from their lists as they please from the database.
- ❖ Prepared team tasks by utilizing trello to delegate tasks to the team to ensure what was needed and unneeded for the project.
- ❖ Assessed the server side code and maintenance, creating a link to our MongoDB and putting up a live React webpage.
- ❖ Maintained MongoDB database which saves the users login information as well as list creations of favorite games.
- ❖ Constructed with the layout and design of the web page and assisted with styling code on React and created the page forms.
- ❖ Designed the free game API allowing users to search up their favorite genre and will display several games related to search.
